ABOUT ME

I am a future student of Software design at ITU in Copenhagen, who is looking for a job as a junior Java developer. I have a commercial experience in web development, as well as having a couple of boot camps oriented in Java and its related frameworks.

Looking for hands-on experience in Java by working on projects within a team.Believing in constant learning by sharing knowledge and taking others' perspectives into account

Curious and motivated enough to continue exploring back-end development and its related perks

EDUCATION

KEA – Københavns Erhvervsakademi

Construction architect – Software(Revit,Naviswork etc.)

2019-2023

Full Stack Developer (Bootcamp)

Boot camp was aimed to get a bigger picture of Java and to dive depeer into its frameworks.Final project was made in group of 3 people ,where we made a simple reservation system with its databse.The web-page was made in Javascript to ease the usage of a system for employees

while(!(succeed = try ()));

PROJECTS CREATED

Drug-store database (Java,MYSQL,SPRINGBOOT,JavaScript)

Participating in the development of a web-page for Slovak drug store, together with incorporating its database to manage data for further process

Dynamo Scripts(Python)

Writing scripts within one architecture software to eliminate repetitive tasks within the process of designing and maintaining construction projects

Digital days UCN – Aalborg

Heckathon (3 days) – 2021

Working on a simple app for the facility maintenance of school, where I was part of a group of 4 international students, who developed an app, which was awarded as one of the best among 20 others

PROGRAMMING SKILLS

- **Java (SpringBoot,JPA)** intermediate level
